WORK EXPERIENCE

FLIGHT CENTRE

 - *June 2012 - Current*

At Flight Centre my role has introduced me to a lot of new technologies and oportunites. I have been responsible for assisting with moving the development team to an Agile workflow that is centred around Git. I have worked with a variety of software including: Apache Solr, Drupal, IBM WebSphere, Git. My role has required me to write code in a variety of languages including like Python and Ruby but I have been focused on PHP and Javascript development.

Responsibilities

- Git workflow with a team of 50 developers (world wide)
- Drupal module development

- Javascript/jQuery code standards
- Deployments of corporate code base
- Global support for a backend migration

WEB CIRLCE

🇬🇧 - *January 2009 - June 2012*

Web Cirlce was my first real developer role, I was involved in the whole client flow from gathering requirements to working through until project sign off.

Responsibilities

- Used a variety of open source CMS's including WordPress, Drupal, Joomla
- Used open source ecommerce solutions including Magento and OsCommerce
- Responsible for search engine optimisation reports and strategy implementations
- Managed server clusters for clients
- Prepared client documentation and assisted with training

IF WE CAN DREAM

🇬🇧 - *September 2008 - December 2009*

My career started with a 3 month internship at If We Can Dream. This was a small record label on the Gold Coast and I was working with a team to build them a web presence.

Responsibilities

- Working with Drupal
